CAREER OBJECTIVE

To secure a position in a forward-thinking organization that values innovation and continuous improvement. I demonstrate strong problem-solving skills to contribute strategically to organizational success while advancing professional growth.

EDUCATION

CMR Engineering College CGPA: 8.92 Bachelor of Technology Computer Science & Engineering	2023 – 2027
Narayana Junior College CGPA: 9.6 Intermediate MPC	2023
Sai Sindhu Grammar School CGPA: 10.0 High School SSC	2021

TECHNICAL SKILLS

Languages: Java, C, JavaScript, Python

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, Tailwind CSS

Databases: MySQL, MongoDB

Tools: Git, GitHub, REST APIs

Others: Data Structures & Algorithms, OOP in Java

Soft Skills: Teamwork, Problem-Solving, Time Management, Leadership

PROJECTS

StudyVault

MongoDB | Express.js | React.js | Node.js (MERN Stack)

- Built a full-stack study material sharing platform enabling students to upload, browse, and download academic files (PDFs, DOCX, PPT), successfully tested with 20+ users; deployed on Render with Cloudinary for cloud file storage.
- Designed RESTful APIs using Node.js and Express.js connected to MongoDB via Mongoose ODM for persistent data storage.
- Implemented JWT-based user authentication for secure, session-managed access, and used Context API for global state management in React.js.

Healthcare

React.js | Gemini LLM API | Tesseract.js (OCR)

- Crafted a web app allowing users to upload medical prescription images or text and receive simplified medication details, side effects, and guidance in real-time.
- Integrated Tesseract.js for OCR-based image-to-text extraction and Gemini LLM API to generate patient-friendly insights with average response time under 2s.
- Built a fully responsive React.js frontend with accessible layouts targeting non-technical healthcare users.

Hospital Management System

Java | MySQL | JDBC | Git

- Developed a console-based Hospital Management System in Java to automate core hospital workflows including patient registration, appointment scheduling, and doctor management.
- Used JDBC for MySQL connectivity to implement modules for adding patient records, viewing registrations, booking appointments, and maintaining doctor information.
- Applied a modular class design with Patient, Doctor, and Appointment entities, incorporating availability validation and a menu-driven interface for streamlined operations.

CERTIFICATIONS

- Java Fundamentals Certification – Infosys Springboard
- Elite Certification in Java Programming – NPTEL
- Java Programming Certification – GeeksforGeeks
- Merit Certificate – Codeathon

ACHIEVEMENTS

- Earned 2-Star rating on CodeChef and achieved Knight rank on LeetCode with a rating of 1850.
- Selected among the top 20 teams at the IIIT Hyderabad Hackathon.
- Finalist at the national-level TechnoVista Hackathon at VNR VJTIET, placing in the top 56 out of 150+ teams in a 24-hour event.
